Quick Start Guide

Installation Requirements

- UniFi Video Camera G3, model UVC-G3
- Phillips screwdriver

Hardware Overview

LED Ring Houses six high-intensity infrared LEDs for extended night vision range.

Accessory Connector Connects to the UVC-G3 for power and IR control.

Screws Pre-installed screws that secure the *LED Ring* to the UVC-G3 camera during the installation.

! WARNING: Do not connect anything to the *Accessory Connector* other than the UVC G3 camera, as it may cause damage to the device. The *Accessory Connector* is designed for use with the UVC G3 camera only.

Hardware Installation

1. Pull out the sun visor and remove it. Then remove the accessory port cover located on the bottom of the UVC-G3.

2. Hold the UVC-G3-LED with the *Accessory Connector* at the bottom. Place the *LED Ring* over the front face of the camera and insert the *LED Ring* until it locks into place.

Note: If the pre-installed screws protrude into the open space of the *LED Ring*, use a phillips screwdriver to turn each of the two screws counterclockwise until the perimeter is clear. This will provide proper clearance and allow the *LED Ring* to slide onto the UVC G3 camera.

3. Insert the *Accessory Connector* into the accessory port until it locks into place.

4. Secure the UVC-G3-LED to the camera by tightening the two screws located underneath the *LED Ring*.

 **Important:** Do not over-tighten the two screws. Excessive torque may damage the *LED Ring* and/or the UVC-G3.

Enabling the External IR LEDs

The UVC-G3-LED may be enabled using UniFi Video or directly through the camera UI. Once enabled, the UVC-G3-LED will automatically turn on under low light conditions.
